Feature Requests:

Ok, on-line in: <http://xoopsers.com.br/modules/newbb/>

Hi php_pp

The English is really a great barrier for me, but I go trying to inside communicate me of the possibilities. I go to order the text in Portuguese also and if not to give to understand will have to find I assist together to some member that the Portuguese says: -)

Suggestions:

1 - Block (Hanging answers)

You it will be able to find this in functioning in the site www.xoops.net.br but using newbb 1.0

As this is functioning.

The user creates a new topic. While nobody to answer it is in this block separately. Of this form we obtain a bigger productivity of the support teams. Elaborated answers more are carried through later that we activate this.

2 - Block (It decided my problem)

The functioning would be the following one: The user will go to receive a reply. If it to find that this decided the 100% its problem it will be able to mark this topic in special. Many other users also will be able to mark this topic in special. We want to remember that only the reply in itself it is that it will have to receive this accompaniment. Of this form we will be able to have a block where the user could be directed to see answers that had really functioned.

obs: These are the alterations more urgent than they would be necessary for we in future versions in the CBB: -)
