=====

This module features a simple Social Network for your xoops site.
Very recommended for communities sites. It allows users to have a personal album of pictures, a personal album of videos from youtube, a list of friends, a public wall for messages(scraps) ,to create communities (tribes), to adjust configs to set who can see what, it also allows admins to block users from using the site for a certain amount of time.
The use of the module is very simple and the front end is clean and beautiful thanks to the lightbox2 feature and to jquery tabs.
