Mikhail, do you know if it is possible to write any advice to help convert phpnuke modules to Xoops?

No, but I know that is easy convert the phpnuke as a XOOPS module (like a "abstraction layer"), so...  
is possible run any nuke module (I think)....

was easy make a "poor version" that work(ed).

There 2 topics about it in [XOOPS Brasil](#) website and [XOOPS Brasil](#) orkut.
