About: "Suggest guidelines for writing articles and promotional materials"

This is really important.

I suppose to make articles in 2 directions:

- no much technicals articles to magazines and websites but to inform the advantages of the system in a general way, to conquer webmasters that still they use static sites in HTML.

- more technical: speed compare with others CMS, the advantages of Smarty, etc..

Other info is the version of xampp (Apache, MySQL, PHP4 and 5,) with automatic XOOPS install made by the brazilian support site www.xoops.net.br, is a good idea make this in any local support to send to magazines and downloads sites.

my 2cents
