Hello, fallenangel.

See this website, its what you want.

<http://www.comgenesis.com.br>

Again, excuse me my poor english.

I don't know if you understand, but, I try.

Use iframe in on the table in top of theme.html:

```
<iframe color="#FFFFFF" marginwidth="0" marginheight="0"
src="{xoops_imageurl}>iframe.htm" frameborder="0"
width="650" scrolling="no" height="180"></iframe>
```

You have create a file (called iframe.htm) and place in the same theme folder, with content:

```
<html>
<head>
<meta http-equiv="Content-Type" content="text/html; charset=windows-1252">
<title>Comunidade Evangélica Gênesis</title>
</head>
<body topmargin="0" leftmargin="0" rightmargin="0" bottommargin="0" marginwidth="0"
marginheight="0">
<div align="center">
<table border="0" cellspacing="0" cellpadding="0">
<tr>
<td align="center">
<script language="JavaScript">
hoje = new Date()
numero_de_imagens = 9
segundos = hoje.getSeconds()
numero = segundos % numero_de_imagens
if (numero == 0){
banner = "images/top01.jpg"
link = "http://www.comgenesis.com.br"
alvo = "_parent"
}
if (numero == 01){
banner = "images/top02.jpg"
```

```
link = "http://www.comgenesis.com.br"
alvo = "_parent"
}
if (numero == 02){
banner = "images/top03.jpg"
link = "http://www.comgenesis.com.br"
alvo = "_parent"
}
if (numero == 03){
banner = "images/top04.jpg"
link = "http://www.comgenesis.com.br"
alvo = "_parent"
}
if (numero == 04){
banner = "images/top05.jpg"
link = "http://www.comgenesis.com.br"
alvo = "_parent"
}
if (numero == 05){
banner = "images/top06.jpg"
link = "http://www.comgenesis.com.br"
alvo = "_parent"
}
if (numero == 06){
banner = "images/top07.jpg"
link = "http://www.comgenesis.com.br"
alvo = "_parent"
}
if (numero == 07){
banner = "images/top08.jpg"
link = "http://www.comgenesis.com.br"
alvo = "_parent"
}
if (numero == 08){
banner = "images/top09.jpg"
link = "http://www.comgenesis.com.br"
alvo = "_parent"
}
document.write('<a href="' + link + '" target="' + alvo + '" ></a>')
</script>
</td>
</tr>
</table>
</div>
</body>
</html>
```
