I'm opening the discussion here as following the 2.0.14 version. This latest XOOPS version does not include any modules anymore. Why not create a XOOPS module pack.

About this question, please , look release module for approve

[XoopsPoll - Multi-blocks, very hacks and more](#)

Tested in XOOPS 2.0.14

Original in portuguese [Novo Release do XoopsPoll - Multi-Bloco e tem mais](#)

I know this discussion has been already leaded somewhere else in the past. I think that with this new politic, we need to open it again.

So here are my questions:

Quote:

1) Do we have to include module along with the core files, or do we create XOOPS module packs?

Yes

Quote:

2) What kind of module and which module would you suggest to include?

All basic modules.

- News (very Important)
- Downloads.
- WfSections or Smartsections.

- XoopsPolls
 - MyLinks or SmartLinks
 - Cbb - Fórum
 - Profile (for version 2.14)
 - SmartPartner or equal.
 - XoopsProtector (very important)
 - Mypage (by Hervet)
 - MultiMenu (very important)
 - XoopsEditor (very, very, important)
 - Wiki (various options, one is oficial)
 - Xmail (rss
)
 - XT-Conteudo (rss, double)
 - Members On-Line by XT (for me very important)
 - RW-Banner (The best module XOOPS for banners XT) My opnion, please.
-
- XoopsGallery or XcGal (fotos, very important)

Themes.

5 (five) themes in pack.

Thanks Solo, my time is very small.

sorry for my poor english, rs
