Definitely **NOT** a good idea to bundle Core + Modules ... it would require a very hefty download - and much more updating ....

I agree David, but and mod\_pack-2.14 - core modules (modules, modules and modules )

If new version 2.0.15 for example, new module pack too mod\_pack-2.0.15

[Poll for your vote please](#)

I go to create module pack for brazilian USERS, no problem
