At least told me that you have downloaded the file!!

Hi Proozella.

Well, first forgive me for my very poor English. I use google to translate the text.

I downloaded the file and see your ideas.

I am developing a module for management of banners that he possesss these resources mentioned for you and much more.

It makes a complete management of banners, with statisticians and separation of banners in categories.

Moreover you can manage the smarty variables for exhibition banners and can also publish banners in news, articles and even in fóruns.

The module not yet is available for download but you can see it in action here

<http://www.xoops.net.br>.

The module and the site are only in mine language (Portuguese of Brazil) but soon and with aid of interested people I will go distribute it in other languages.

So, if you wants to contact me to give new ideas mine msn is rplima2005 at hotmail dot

Rodrigo
