yes, ISmart is a new commercial cms 'xoops based', is a parallel project from [www.xoops.net.br](http://www.xoops.net.br) and [XOOPS Brasil](#) team

It's not true...

I develop modules, i like XOOPS to work, my company sell support with xoops. But we share part of our work with the community and i think that is a good price to pay for this wonderful CMS. I dont care if some peoples dont do the same, i do my part helping XOOPS grow up.

Please, dont think wrong about the brazillians XOOPS communities... No one is commercial and all do the best for they users.

Thank You!
