OK, Installed this hack works great,
(by khuhner on 2006/10/24 1:19:43)
xoops 2.0.16 + heavy hacks...

Noticed one small syntx error in the code and added xoops-ulr(instead of yourdomain.com)..

Attached the modified one..just upload and add link into login blocks.

could not attach but here it is,

```
=====re-activate.php
<?PHP
