URL:

I think the hacks related but not sure. My problems mainly are blank page without any debug info (the PHP debug mode ON). I meant blank page with no characters inside.

- when access {xoops_url}/notifications.php
- when access {xoops_url}/rw_banner/admin/inser.php ([ref](#))
- when submit answer to an opened question of SmartFAQ 1.0.4 beta3 ([ref](#))
- when try to edit "Mail Setup" by accessing
{xoops_url}/modules/system/admin.php?fct=preferences&op=show&confcat_id=7

- CentOS 4.4
- Apache 2
- PHP: 4.3.9
- MySql: 4.1.20
- Xoops: 2.0.15
- + form.php replacement applied
- + rw-banner hacks on the header.php and class/module.textsanitizer.php
- + GIJOE's Protector 2.57 installed
- + GIJOE's hack 1: [Fastest Cache Hack \(Experimental version\)](#)
- + GIJOE's hack 2: [Speed up your XOOPS site](#)
- + m0nty's [AUTO Thumbnail on img tag hack](#)
