Thank you. Seems the link [http://www.xoops.net.br/modules/xhnew ... 21&post\\_id=81#forumpost81](http://www.xoops.net.br/modules/xhnew ... 21&post_id=81#forumpost81)

for downloading the module rw-banner is dead. Can anyone who has the latest version send me a link please. I certainly looking forward for a new release for XOOPS 2.0.17 and that new features are added link reports, billing/financial system, etc, is there any way to integrate ads from open ads (openads.org) like calling ads from openads systems by using banner code. Rw-Banner is by far one of the best banner modules in variose aspects.

thanks
