Oh Nuno Luciano/Damaster, why on earth did you harass me on my personal site several times 'in disguise' and behind a proxy leaving rude and offensive comments? Are you not man enough to face up to the fact that I have retired from xoops??

And even worse: why did you hack into my LinkedIn account today and removed all my contacts (115!) and destroyed all my professional experience data?? This damages my professional image! It's very childish to say the least, and is completely out of line!

This is my very very last post here. Good bye.

Herko - who has had it with the people trying to destroy what this great community has built just because their name wasn't printed in blinking red lights on it -even if they don't deserve it

Sorry all collaborators here:

@Marcan attention please.

- Project Xoopstotal in sf.net hacked, damaged, renamed, destroy in 2004. I reported here and Herko too.

- My name and partners Giba is hacked, destroyed sites, projects removed. I reported here too.

- Site support [XOOPS Brasil](#) hacked, users removed, good and excellent material removed, and more...

- Site support [www.xoops.net.br](#) hacked, privacy users removed, e-mail bomb sent for all users with content racism...etc...

- Site [www.xoops.net.br](#) destroyed, users privacy changed, and more. Reported here too.

Yes, I am not friend this hacker Mika and others too imbecils, this is the best idiot (mika and trupe), but admins XOOPS here in special Herko, removed [XOOPS Brasil](#) in 2004 for support official and (ninguém) spoke about it.

but I love xoops, I have good friends here. I respect users and devs modules, themes, works and collaborators.

But transparence is important in opensource.

Take care.

oops edited for myself.

My vote continue, for Herve Council, transparence, respect, and go XOOPS the next generation.....
