URL:

Been looking all over for Wiwimod version 0.8.6 but can't find a final version of it. Giba recommended it to me for the wiki and I want to try it.

I am using 0.8.3 and want to upgrade to see if solves the problem I'm getting with phppp's XLanguage

Anybody know where I can get it?

I looked in Brasil an found [this thread](#)

In XOOPS search I found [this news article](#)

Is the final one the beta 0.8.6 named in the comments of that news article?
