It sounds exciting.

You are of course, invited to include <http://xoops-end-user.com/> in any testing you might need or want to do.

Currently, take a look at

<http://www.xoops.net.br/> and examine the new version XOOPS that Gibphp has provided me for testing.

Register and you gain full access with admin privledges.

You may add blocks as you see fit and if you have something that needs to be uploaded I will work with you.

<http://xoops-end-user.com/xoops01> << VACANT

<http://www.xoops.net.br> << PURE XOOPS 2.0.16 INSTALL

<http://www.xoops.net.br> << MediaWiki
