Thanks underdog! Point made.

I am afraid I might have been misunderstood...

When I refer to advertising, I mean what ever it is you have interest in... not particularly XOOPS related, just using XOOPS as your means of promoting your product. I have visited many sites that have been made with XOOPS and have throughly enjoyed the information they bring to me.

Sailjapan talks about sailing in Japan...

Ka0maz links to his community church...

optikool talks about her hobbies and web paging efforts on her my page link. I have seen some interesting Fun and games sites done with xoops, along with some fine philanthropy sites. (one about MS)

I don't know about you but I have a hard time keeping track of all the different places I can go for information and don't begin to know everyone who does websites that I could see examples of their work in action.

IF You Own a website, then come on over and list it along with the others, that included if you own an XOOPS information type site.

Does this help explain my intention?

Thanks, ...darcy

BTW: My vision is if you do Modules or Themes or something else xoopswise that would interest me you will list it here for my easy reference.
