Christien,

I hope this can help you see where the create a template is.

[TemplateSetManager](#)

There is a column headed CREATE

Now to get there you would go to system and use the drop down menu to templates.

The Module you are wanting to create a template for will be in that list if you have uploaded it correctly.

EXAMPLE of populated [LOOK HERE for Best example](#)

I hope this will help you.

BTW: I find the site searchbar to be valuable if there is something else you would like to look up.
