Damaster doesn't want to check it out, the only thing he is content with doing here on XOOPS is causing disruption and using other peoples accounts without their permission.

as for [XOOPS Brasil](#) 2.0.18, yes the admin interface is superb, I don't think you'll find a person here on XOOPS that thinks any differently with that opinion. certainly a lot of effort has been made to produce that version, and everyone here applauds their efforts.. myself included.

we certainly 200% need more cooperation between the core devs and the local support site developers as a whole.
