URL:

Modules from the Archives that are no longer available through dev.xoops.org.

Pick up from the archives in zip format, they will not open in winzip but they are fine opened in IE and other browsers -- I have viewed some of the video tutors and they work fine.

These were procured for Debianus per request on another thread.

[End-User Wiki ready for uploads](#)

Also others for Peekays and others benefit.

[ModuleArchives](#)

Hopefully others will also find these of value.
