URL:

Recently I stumbled the Beautiful Verde theme, by XoopsMexico and XOOPS Brasil. I've seen it on <http://theme.xoofoo.org>

I wanted to download it.

I went to the [XOOPS Brasil](#) website and found the xmbluext1 theme and found-out they both have the same structure, only different colors. So I started changing the xmbluext1 theme to make it like the verde theme.

Anyway, I won't upload the finished theme to my website, cause I'm afraid of Copyright issues, since the theme developers worked hard.

So I wanted to know if I'll be OK by uploading and using it?

Or where can I download the Verde theme? xoopsTotal is under maintenance...

From where can I get permission to modify the theme?

And final question, Can I change the xmbluext1 theme to make it in my own colors, not like the verde theme?

Just want to be Okay(;

Both themes can be found in <http://theme.xoofoo.org> just select the themes on the left side of the page.
