Blocks Administration:

Show blocks visible in | Top Page | Group | Visible | All

<http://www.xoops.net.br/blocksadmin.htm>

There is a drop down menu at the top where you can select which groups the blocks are visible to. Just in case you missed it. Then of course are the checks for turning visibility on and off.

This is the same but the display is done differently in xoopers which may help you understand what you may have missed on your setup.
