Hi,

I was testing i for some time (not used in production). It is interesting module - better than XOOPS banner system. It has bugs. Some have fixes around, other - don't.

Support site was: <http://www.xoops.net.br/> but it is offline. There were some usefull topics in the forum there

Version 1.5 can bedownloaded here: [http://downloads.sourceforge.net/xoop ...
