This module is an idea of Gopala, you can find the original thread at xoopsBr:

[http://xoops.net.br/modules/newbb/viewtopic.php?forum=1&topic\\_id=1211244208](http://xoops.net.br/modules/newbb/viewtopic.php?forum=1&topic_id=1211244208)

it works like this:

create any page you want

in any page create any tabs you want

in any tab add any blocks you want

select in the block what page you want to show!

It is an alpha and is very raw.

It requires smartobject to run.

My tabs is, in fact, a smartblocks module turn upside down, eheh!

(thanks smartfactory for this great tool)

Enjoy!
