hi'

I have found many mylinks versions :

- o [Mylinks 1.10](#) (seems to be the original, not sure)
- o [Mylinks 1,10 SEO Edition](#) (seems to be less antique)
- o [MyLinks 1.12](#) (someone has added +1... don't know more)
- o [MyLinks-w 3.0](#) (w for winner ?)

Is someone has already tested all mylinks modules ? If yes, wich is the best ?

Thanks in advance
